MARCONI

WHO WE ARE

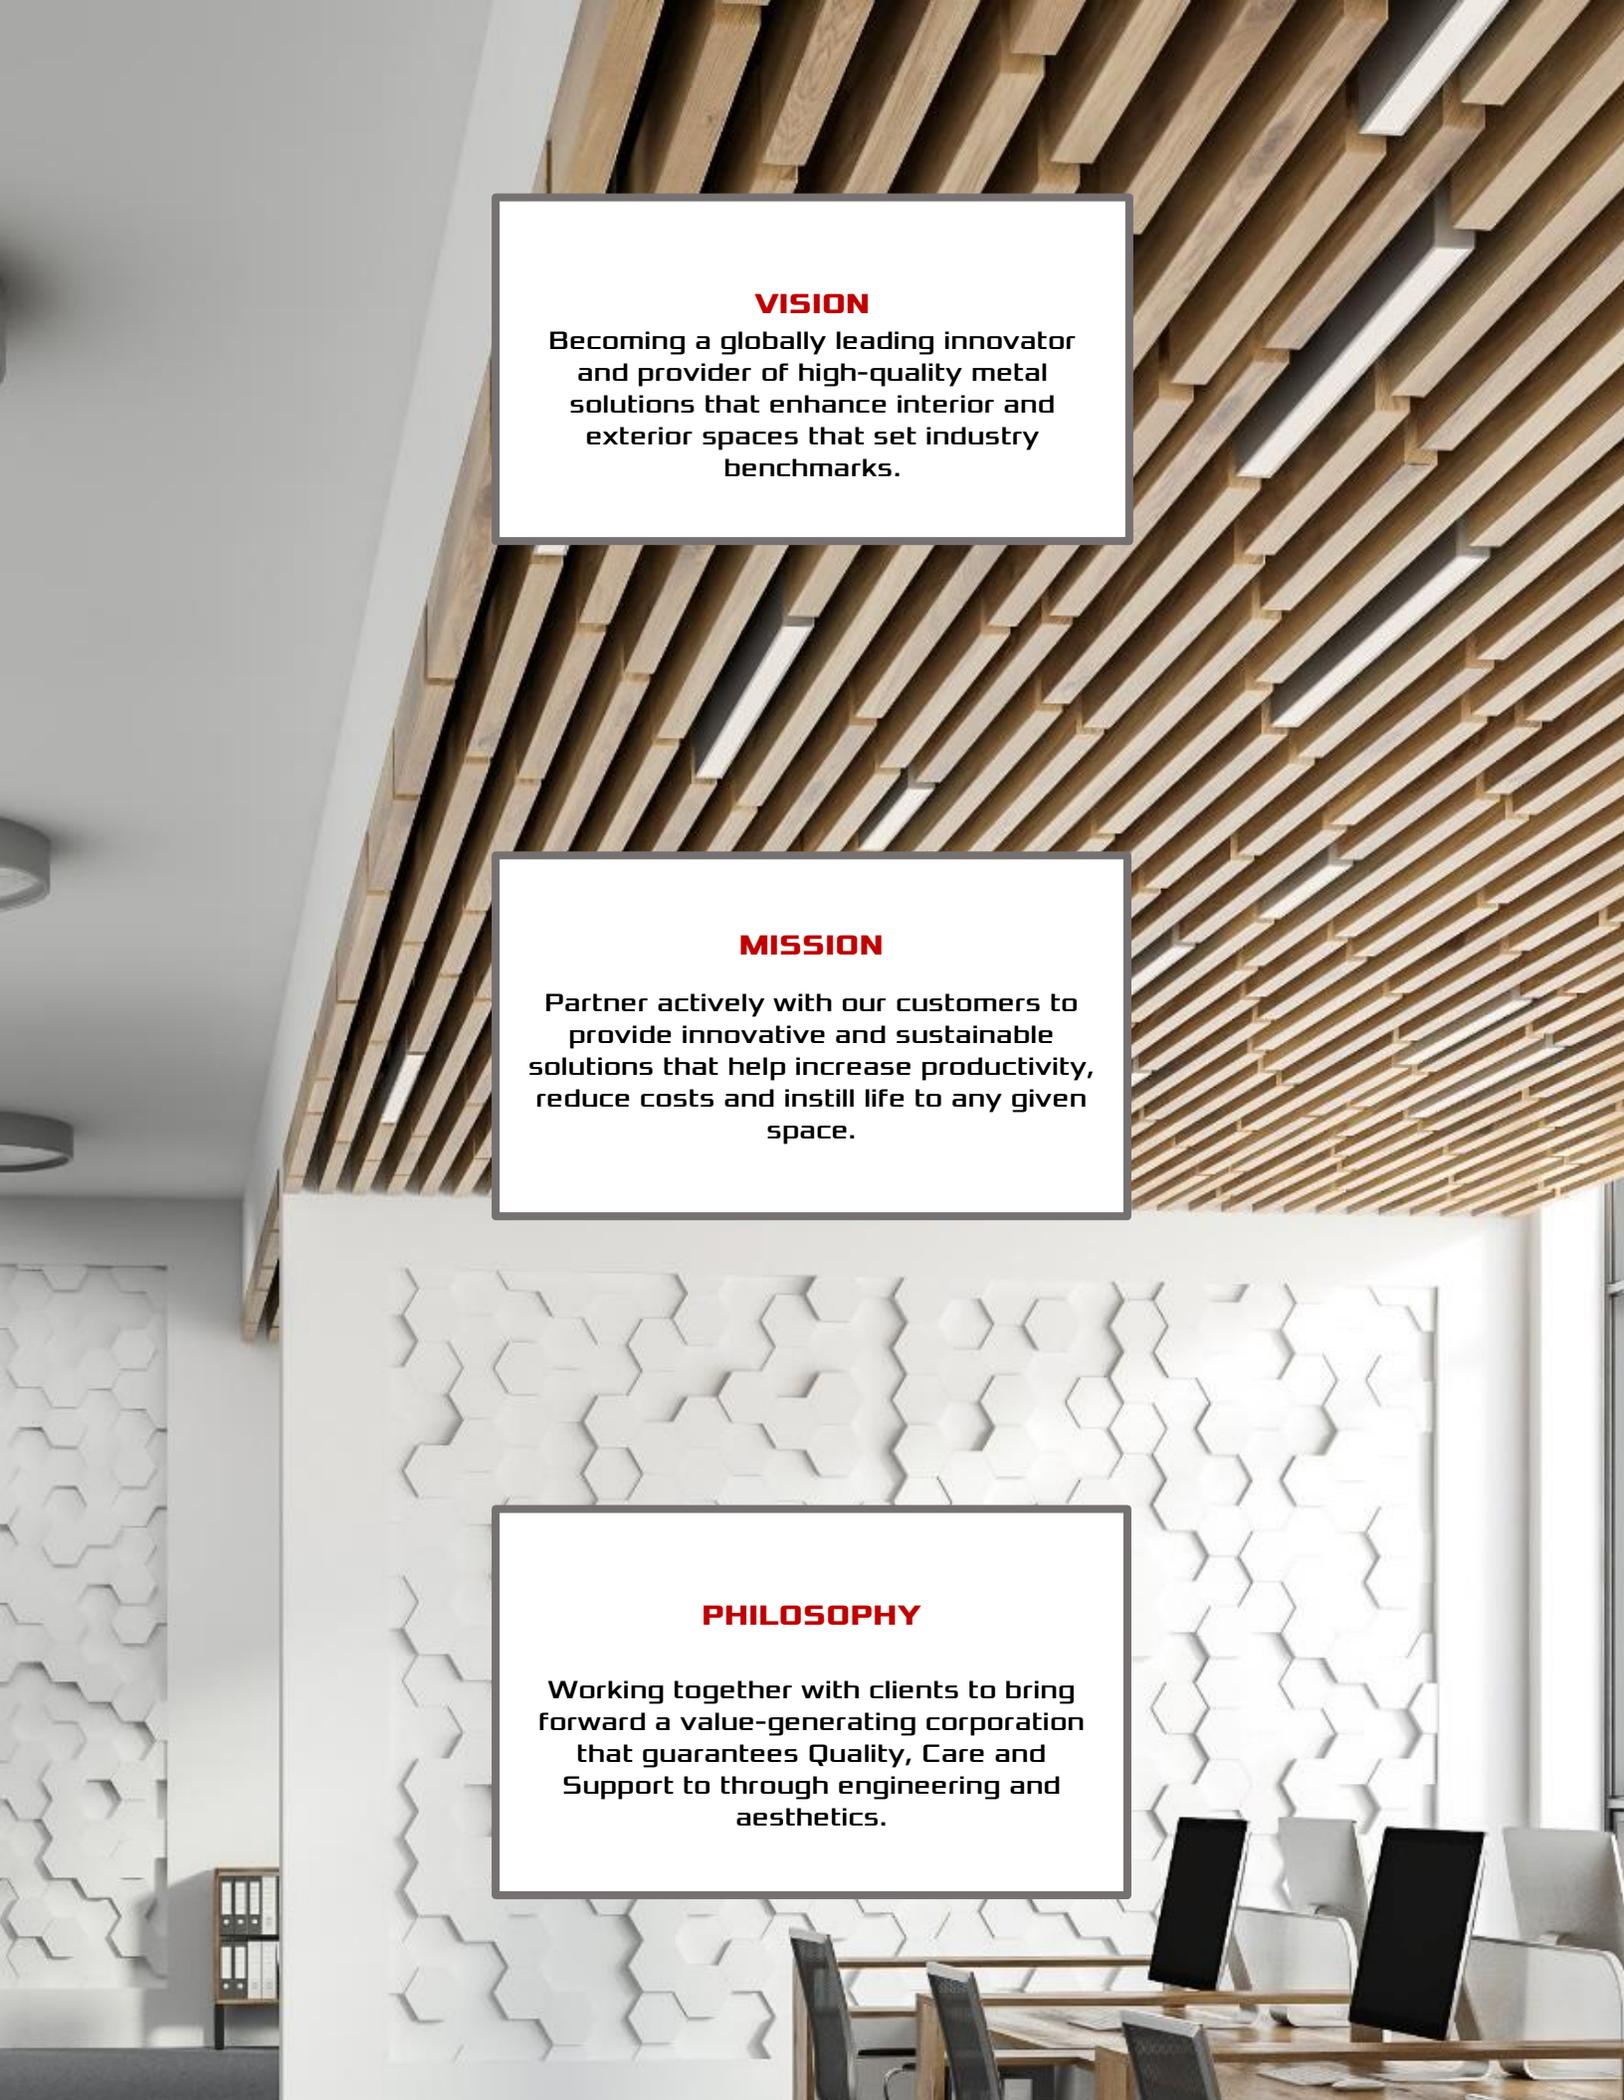

WE'RE NOT JUST MANUFACTURERS, WE ARE YOUR PARTNERS BRINGING YOUR VISION TO LIFE. AT MARCONI WE DON'T JUST CREATE METAL PRODUCTS, WE CRAFT EXPERIENCES. WE LIVE TO REDEFINE SPACES WITH INNOVATIVE METAL SOLUTIONS THAT STAND THE TEST OF TIME.

Born in 1986, Marconi has built a legacy for itself in the GCC region as a leading manufacturer of metal ceilings and profiles under its brand name MATADOR®. Our specialization actively grew and has cultivated into an array of metal products providing solutions for architects and consultants in many different sectors. With decades of experience, we have become a trusted name in the industry, renowned for our commitment to quality and innovation.

Located in Dubai's Industrial City, our complex spans around 10,000 square meters and is equipped with cutting-edge equipment and machinery for punching, laser cutting, perforation, rolling, roll-forming, bending, notching and pressing, powder coating and more. Our annual capacity is 1,000,000 m² of a combination of Aluminium and Steel products.

Our strategic location provides us with unparalleled access to the UAE and GCC road network and ports ensuring that our customers experience rapid lead times for all their projects.

In our commitment to excellence, we continuously push the boundaries of product development not only by creating new products but also enhancing existing ones.

VISION

Becoming a globally leading innovator and provider of high-quality metal solutions that enhance interior and exterior spaces that set industry benchmarks.

MISSION

Partner actively with our customers to provide innovative and sustainable solutions that help increase productivity, reduce costs and instill life to any given space.

PHILOSOPHY

Working together with clients to bring forward a value-generating corporation that guarantees Quality, Care and Support to through engineering and aesthetics.

OUR STORY

Since its initiation in 1986, Marconi Metal Industries has become a pioneer in its field by manufacturing false ceiling products and providing architectural solutions to its clientele under the brand name **MATADOR™**. It's founder and CEO, Mr. Souheil Hatoum left his home in 1984 Beirut, Lebanon and arrived at the United Arab Emirates with nothing more than 200 USD in his pocket; no job, no living space and one friend. Within a few years, with consistent dedication and vigorousness, he and his brother Mr. Sami Hatoum were able to establish a name for their company, being one of the first innovators and implementors that lead the transition, in the market, from plastic to aluminium false ceilings. The founding company was called 'Marconi Inter Design' which provided installation and fitout services as well as offering solutions for architectural designs and projects via

its engineering team lead by co-founder Mr. Sami Hatoum. After stabilizing itself as an establishment, it expanded by forming a sister company called 'Marconi Metal Industries' and became the one of the first local manufacturers to produce aluminium false ceiling panels and profiles. Today, over 30 years later, Marconi 'Metal' and 'Design' are still leaders in the industry and are one of the only companies in the Region that runs both the manufacturing and installation of false ceiling products. Marconi prides itself on its consistency to provide outstanding products which meet performance and quality international standards, whilst working with Designers, Consultants, Contractors and Architects to manage design, functionality, durability and acoustics from specification to installation.

Furthermore, throughout the 30 years, Mr. Souheil Hatoum's Entrepreneurialism has implemented an upstream integration strategy by establishing an Aluminium Coil Coating factory and a Galvanizing cold rolling steel mill, here in the U.A.E; United Metal Coating and United Iron and Steel. The establishments create the Aluminium and Galvanized steel coils which are used to make metal false ceilings, wall cladding, facades, noise barriers and their suspension and fixation systems. This strengthens our brand and its credibility both technically and commercially through quality and precision.

"The application of the 5 C's that molded **Marconi** into Metal; Consistency, Compassion, Chivalry, Consideration and Confidence."

Souheil Hatoum

**LOCAL
PRODUCTION
GLOBAL
DISTRIBUTION**

Marconi Metal's influence extends throughout the GCC, encompassing not only this area but transcending its boundaries. We manufacture, design and support local and international dealers, designers and retailers with technical assistance and sales consultancy from our base in Dubai. We achieve this via a production chain that controls and certifies the supply process from raw material to the finished good.

Made in the **U.A.E**

Specialized production engineering team that covers all processes from the supply of coils, it's colour finish, sheet cutting, to panel and profile bending and forming. A unique integrated manufacturing capability that allows for **complete quality control**.

IT TAKES MORE THAN JUST MACHINES

Cutting-Edge technology which have the means to produce custom made products that cater to the **most challenging of concepts** by creating special metal panels for interior and exterior decoration and application.

WE'VE GOT THE **KNOW-HOW**

As both a Manufacturer and an Installer, **MARCONI** has acquired, over the 30+ years of field and factorial experience, the key technical knowledge that allows us to support our client's needs, prior and post manufacture, to guide them towards achieving the architectural vision for their projects. From Acoustics to lighting to Healthcare and Shade Control, Wall cladding and Facades, our technical engineering team will be with you every step of the way.

Our experience is not just in our finished products but also in the raw material that make up those products.

Marconi Metal has the capability to create products in any finish that modern technology can generate, be it colour or texture

Our advantage in the market is our sister company which has the strongest colour coating complex in the region, reaching markets like Europe, Asia and the Americas.

UNPARALLELED QUALITY

The **upstream integration** has given us capabilities to **control** the supply of **raw materials** for our finished goods. All aluminium and galvanized steel raw materials are produced by our sister company complexes allowing us to ensure that the **quality** of our products are **unmatched**.

All marconi products are **certified** by independent laboratories which follow their relevant **ASTM standards**.

All our finished goods are recyclable and suitable to achieve **LEED certification** scores.

Quality is guaranteed because both our **raw material** and **finished products** can be monitored closely to ensure that all your product specifications are accurately met.

WHAT?

Our metal ceilings, profiles, wall cladding, facades & noise barrier products and solutions.

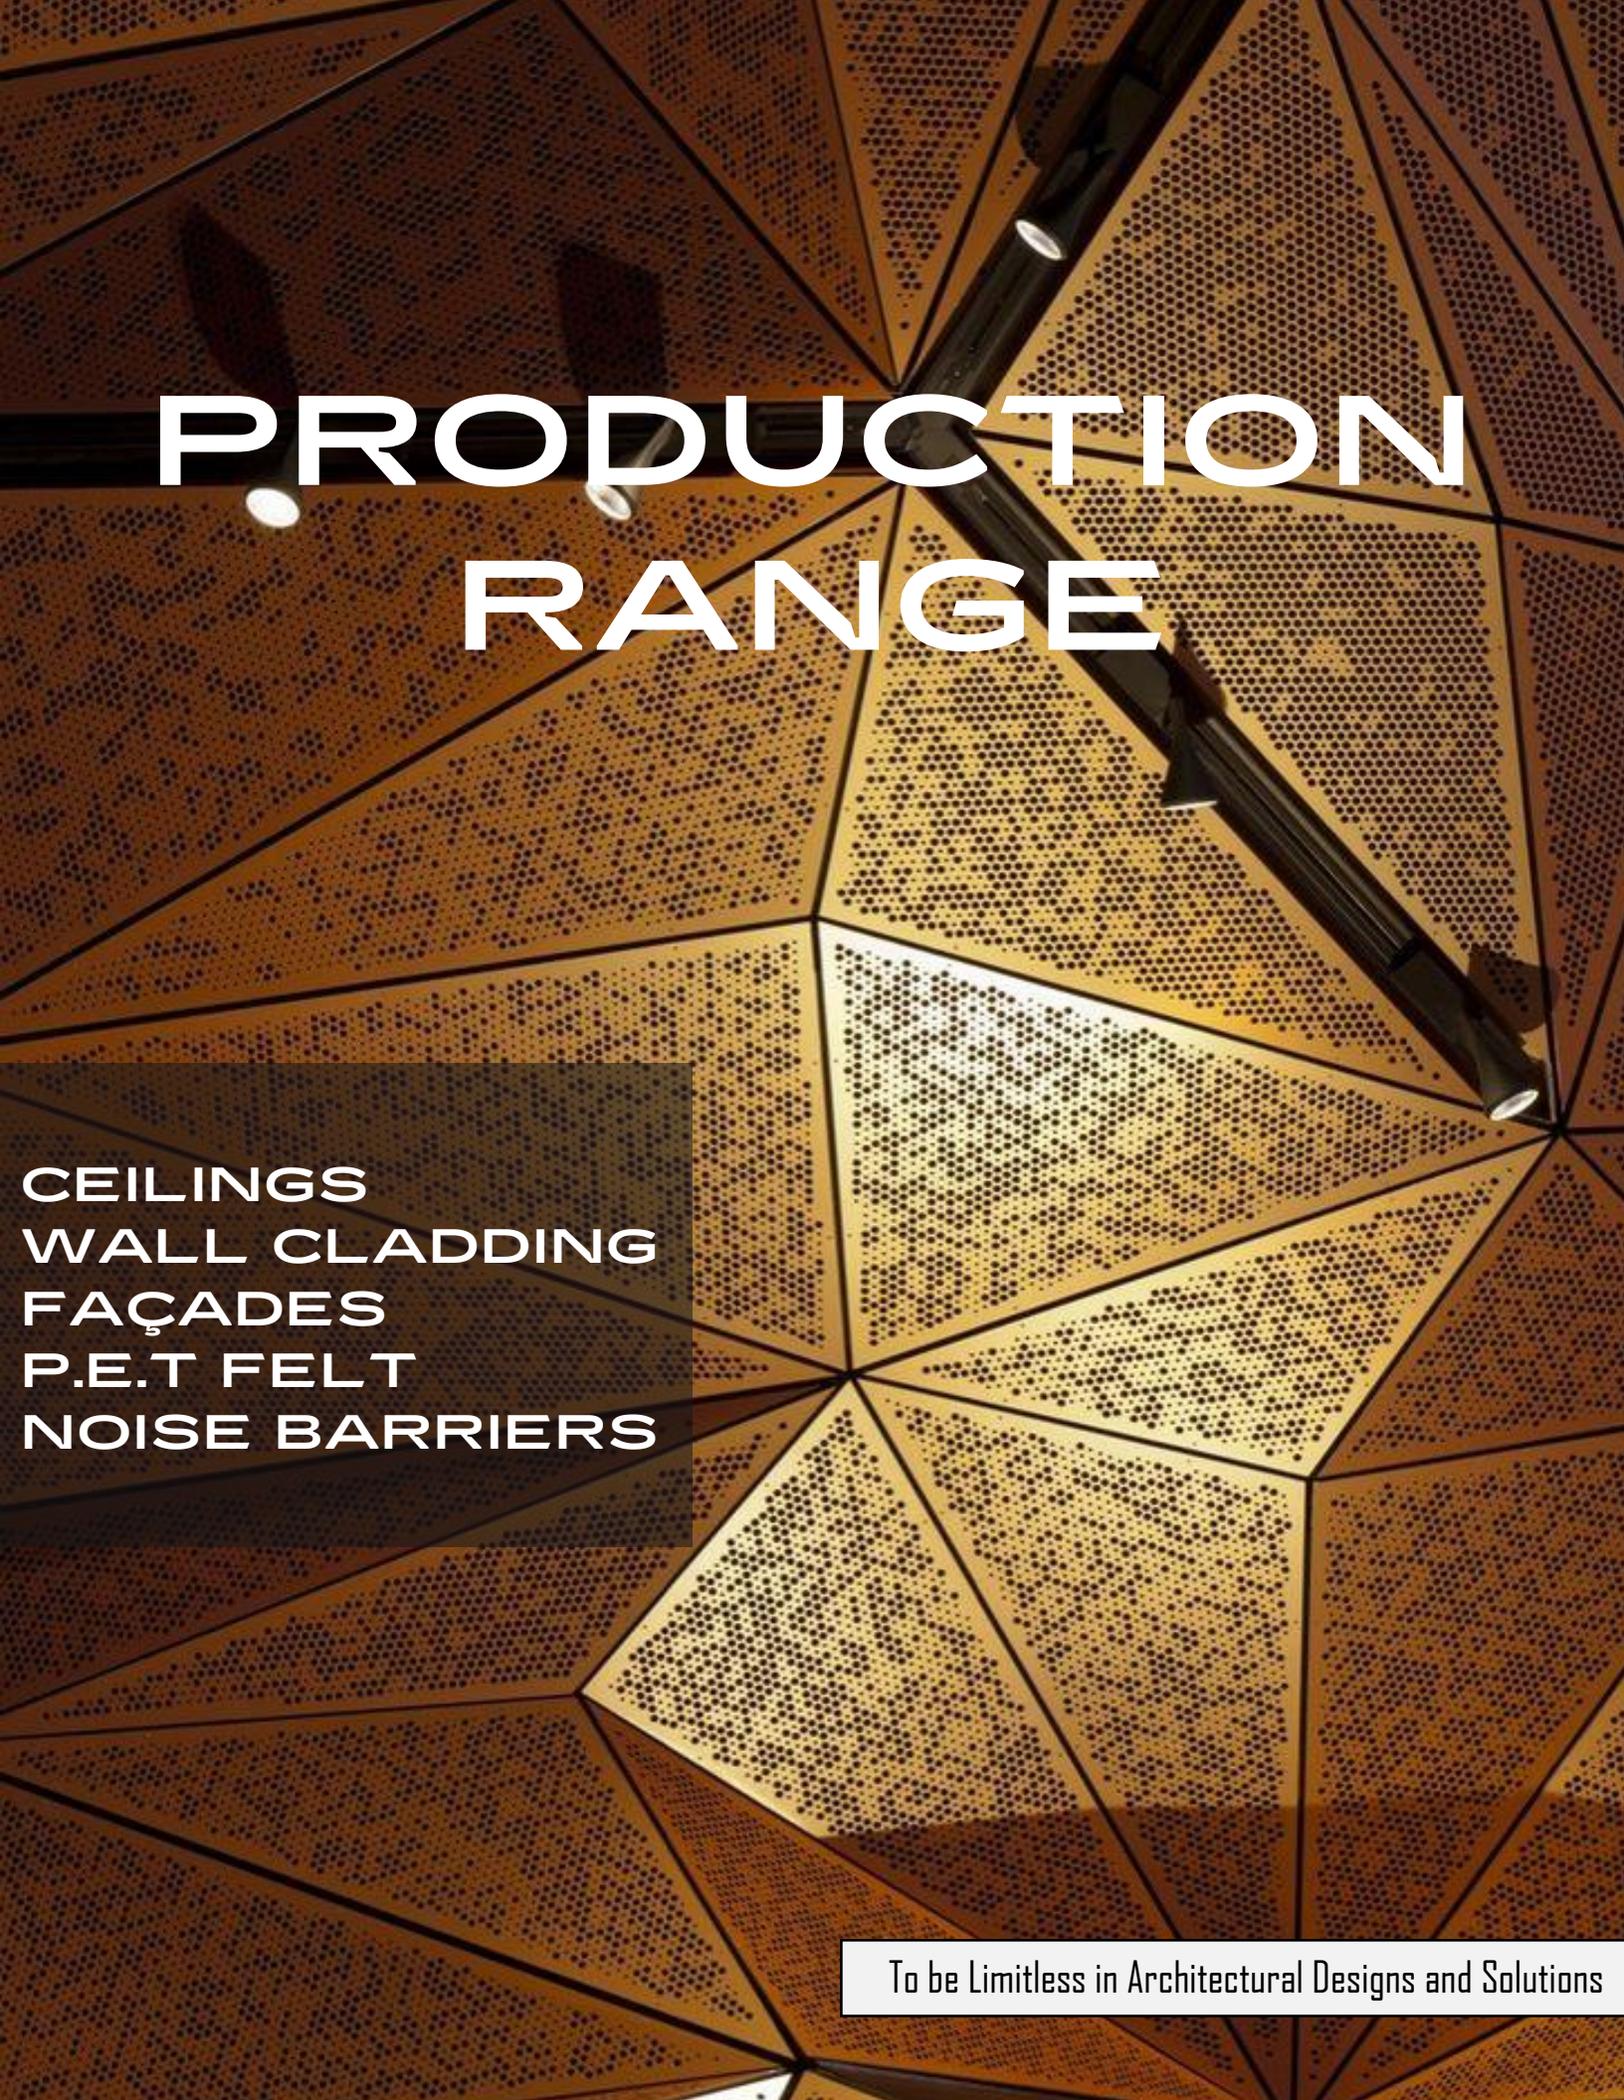

WHY?

Technical teams experienced in manufacturing and interior fitting paired with an upstream integration of raw material manufacturing.

WHEN?

Over 35 years of experience in interior fit out for more than just our products.
Over 30 years of experience in manufacturing metal false ceilings, profiles, wall cladding and more.

INTERNAL SYSTEMS

At **MARCONI** we take immense pride in offering cutting-edge solutions in metal wall cladding for both internal and external environments. With a commitment to transforming architectural visions into reality, we have established a production line that supplies a trusted product that provides solutions to any design. Our expertise lies in providing innovative and sustainable metal cladding systems designed to enhance the aesthetic appeal, functionality, and durability of interior and exterior spaces. From contemporary, sleek designs for modern interiors to weather-resistant, high-performance solutions for exteriors, our metal cladding products are a testament to our unwavering dedication to quality and precision. As a company, we embrace the synergy of design and engineering, resulting in products that not only meet the most demanding architectural and environmental requirements but also inspire creative expression. With our metal wall cladding systems, we offer a world of possibilities, where form and function coexist, creating striking and resilient spaces for years to come.

WALL CLADDING

INTERNAL ACOUSTIC SYSTEMS

Our metal wall cladding systems are not just about enhancing aesthetics; they also excel in optimizing acoustics. With our solutions, we combine stylish design with precise sound control, enabling you to craft interiors in serenity.

WALL CLADDING

EXTERNAL SYSTEMS

Sustainable, Durable & Beautiful: That's Our Metal Promise

WALL CLADDING

EXTERNAL SYSTEMS

Celebrate the harmony of aesthetics and functionality with our exterior metal wall cladding systems. Crafted for lasting beauty and durability, our cladding solutions not only transform your building's facade but also provide exceptional weather resistance. From modern cityscapes to timeless architectural designs, our metal cladding is your shield of protection and a statement of enduring elegance.

FAÇADES

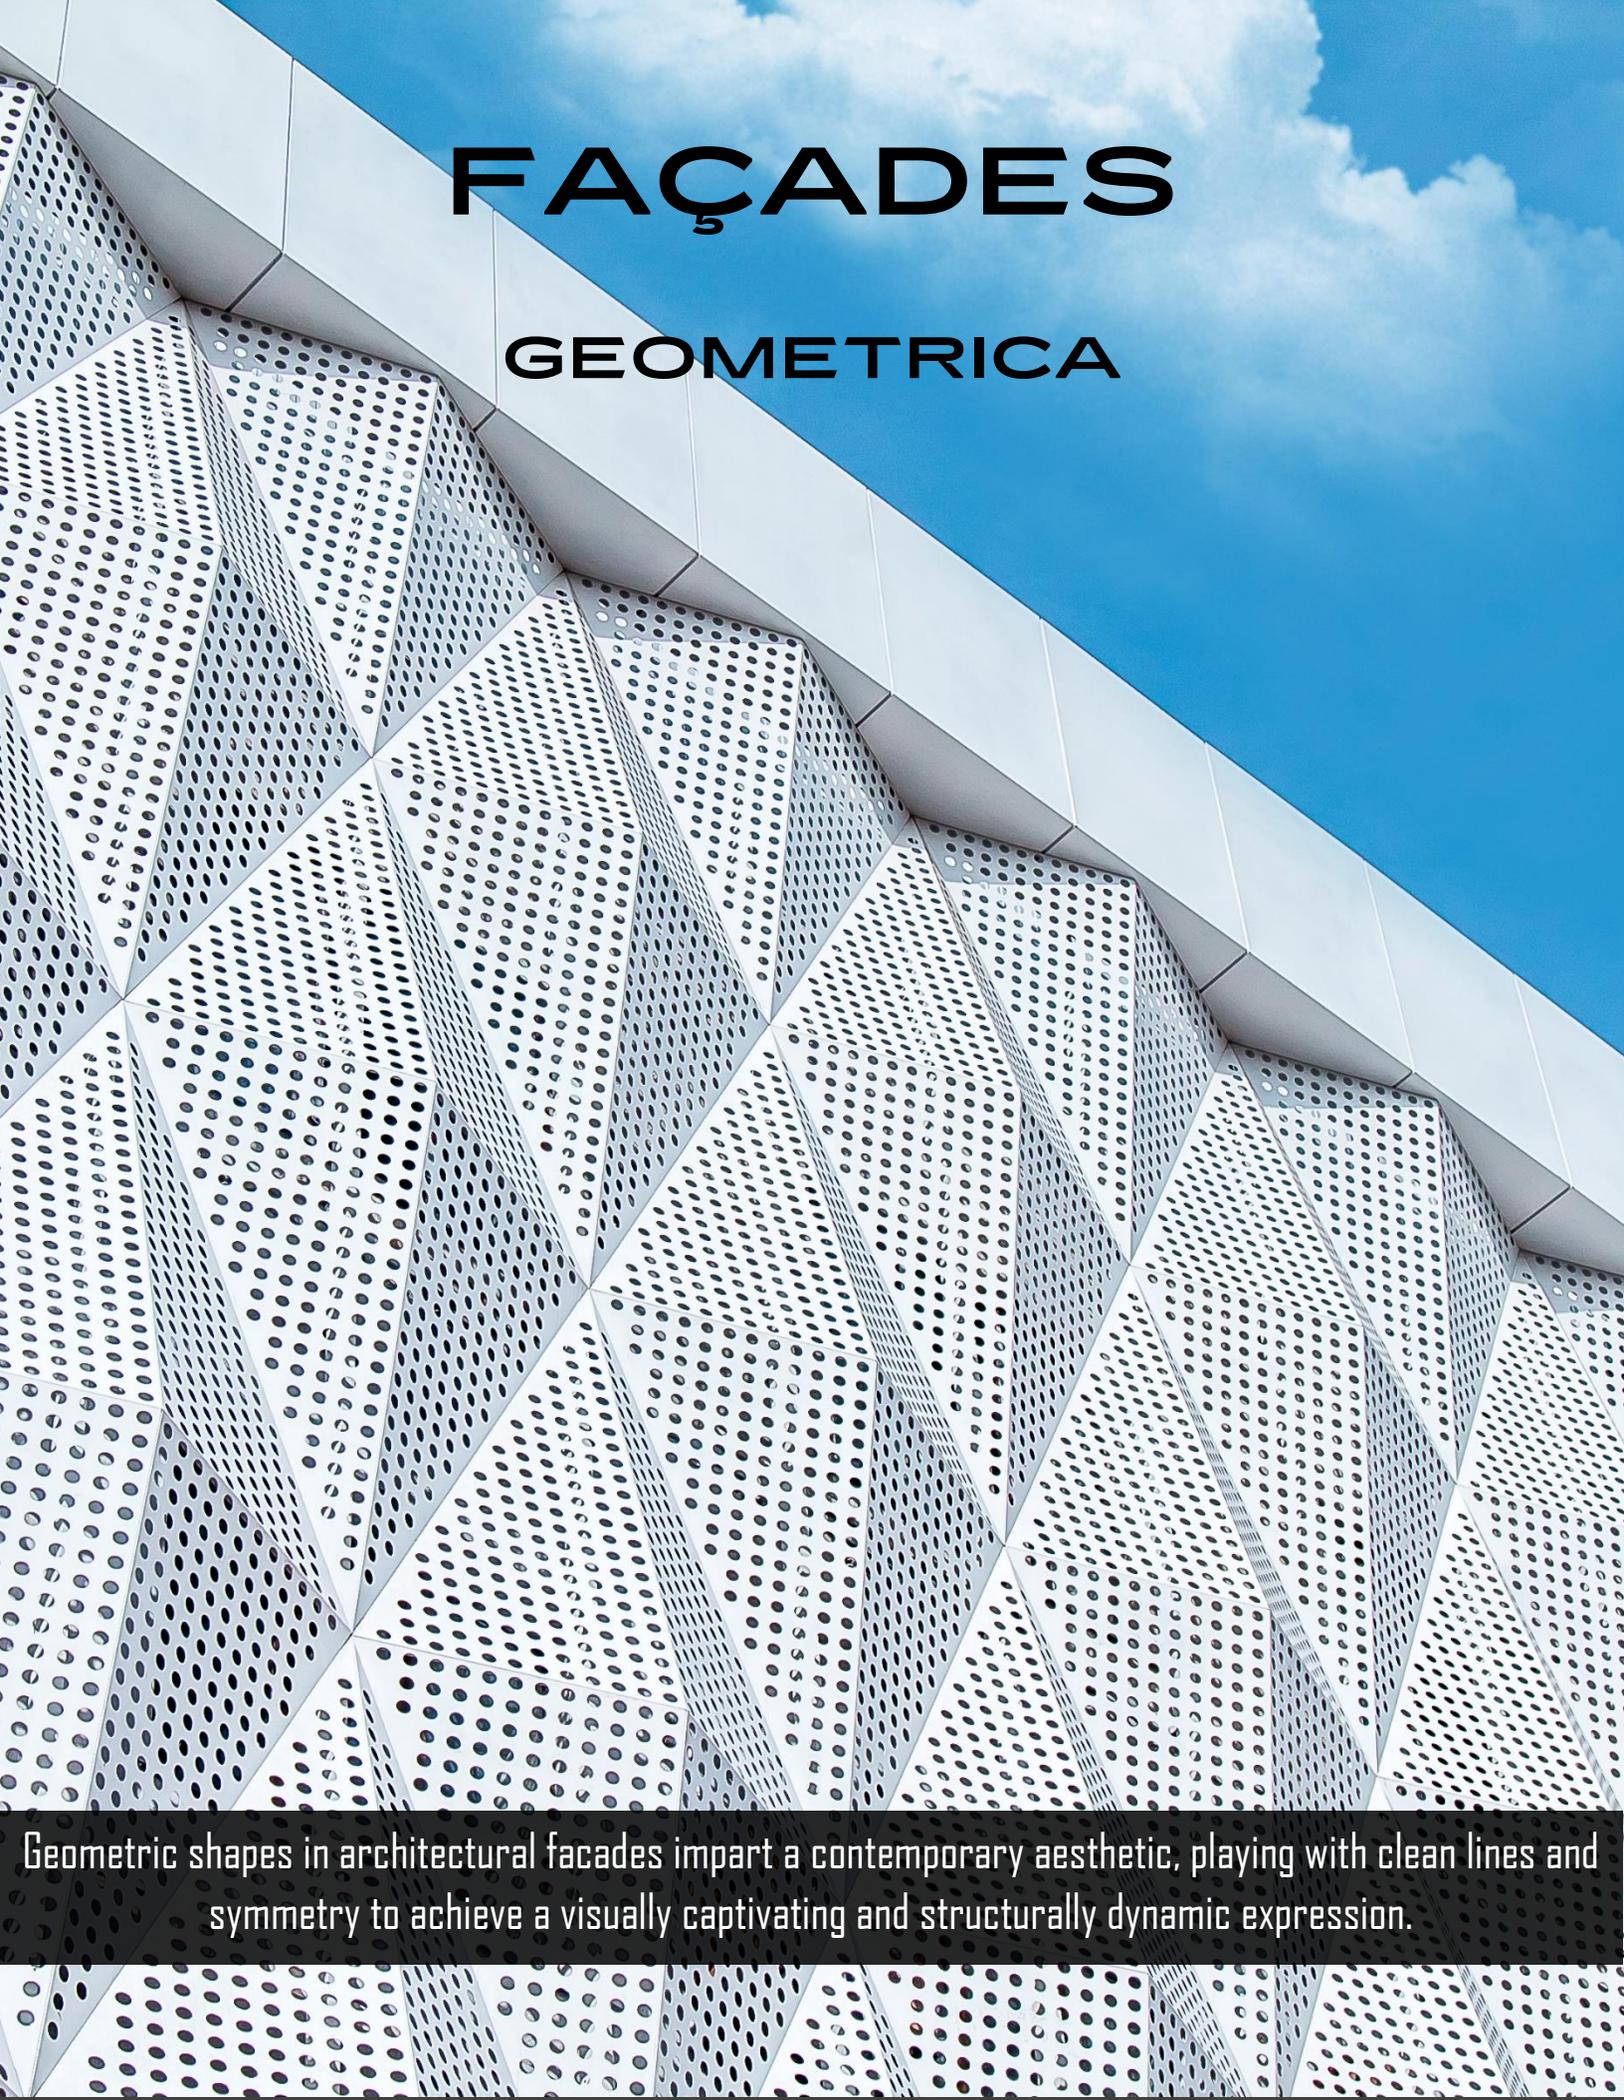

ELEMENTS

Transforming architectural visions into reality, our solutions cater to a wide spectrum of design aspirations for building facades. We extend beyond the conventional, allowing us to craft complex, three-dimensional metal cladding shapes that redefine the possibilities of design. Whether you seek to reflect traditional sophistication or embrace innovative shapes, our metal façade solutions transcend design boundaries, providing limitless possibilities for architectural expression. These Façade systems are not only visually striking but also built to withstand the test of time, ensuring the long-lasting beauty and protection of your architectural masterpieces.

FAÇADES

MESH

Blending architectural innovation with aesthetical allure with an interplay of light and shadow that elevates the visual appeal of any structure.

FAÇADES

GEOMETRICA

Geometric shapes in architectural facades impart a contemporary aesthetic, playing with clean lines and symmetry to achieve a visually captivating and structurally dynamic expression.

NOISE BARRIERS

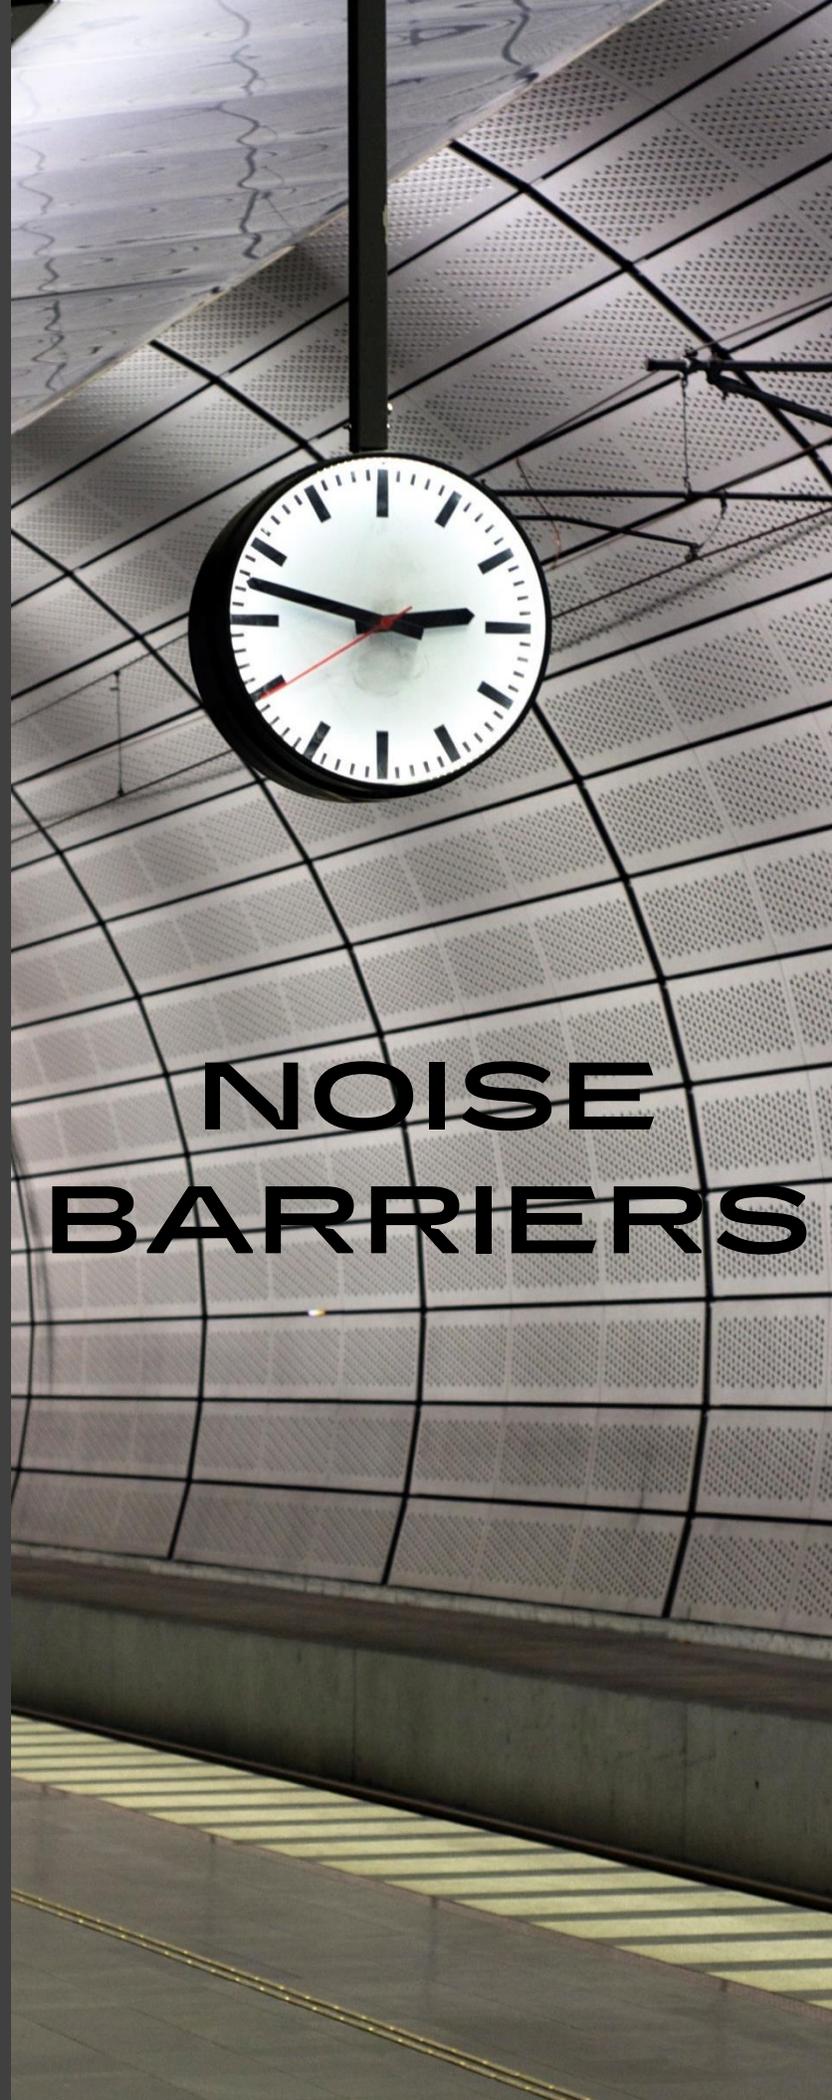

RAILWAY

ROADSIDE

RESIDENTIAL

A total solution bringing acoustic comfort in urban and residential environments. Crafted with precision and durability in mind, these barriers effectively shield against intrusive noise from roads, highways, and industrial zones and more, ensuring a tranquil living space for residents. Engineered from high-quality metals, our barriers not only provide superior sound insulation but also boast a modern aesthetic that seamlessly integrates into the surrounding landscape. Whether you're seeking to enhance the quality of life in residential neighborhoods, shield outdoor recreational spaces, or mitigate the impact of industrial noise, our Metal Noise Barriers stand as a reliable and stylish choice, offering a harmonious blend of functionality and design sophistication. Experience the difference with our innovative solution, setting a new standard for acoustic excellence in your community.

NOISE BARRIERS

Noise barriers in neighborhoods can offer several benefits, contributing to a more pleasant and comfortable living environment for residents.

RESIDENTIAL BENEFIT

- + Improved Sleep and Health
 - + Enhanced Privacy
- + Increased Property Value

SOLUTIONS

To be the best, one must have the capabilities to design and conform to all specifications that come their way. Here at Marconi, we have comprised a many viable solutions to meet all the requirements for your project. The integrated solutions seen here are the most commonly searched for by consultants and contractors. We strive to achieve and meet your need. Do not hesitate to contact us as we praise our self for having an unbeatable response time to any enquiry.

E D U C A T I O N

Aesthetics and Acoustics, bring happiness to your students

In educational settings, where the lively energy of children can contribute to elevated noise levels, prioritizing acoustical treatment is crucial, particularly in classrooms, halls, auditoriums, and gymnasiums; and at Marconi Metal, we offer a diverse range of solutions housed within elegantly designed false ceilings, seamlessly marrying noise reduction efficacy with aesthetic appeal to create a conducive and aesthetically pleasing environment that fosters focused learning and productivity among students and staff.

When ceilings meet healing, a mission to ensure the safety of your patients

The necessity of a bacteria-free environment is undoubtedly the most crucial aspect considered when designing false ceilings for the Healthcare industry. Since our raw materials are sourced directly from our sister companies 'United Metal Coating' and 'United Iron & Steel', we guarantee that your false ceilings are made of supreme quality with the most advanced anti-bacterial coating paint that technology can provide. Marconi Metal Healthcare solutions will advise you on the most suitable ceiling for your project; taking into consideration how to minimize dust and bacterial build-up whilst minimizing maintenance services; saving both time and money.

Elevate Every Note, Diminish Every Echo: Acoustic Brilliance Redefined

In environments where optimal acoustics are paramount, such as theaters, large halls, conference room and more, the need for effective acoustic solutions cannot be overstated. Recognizing this imperative, we have built a comprehensive suite of acoustic solutions meticulously designed for these spaces. From acoustic panels seamlessly integrated into our metal ceilings to purpose-built wall claddings, our offerings strike a harmonious balance between superior sound absorption and captivating design. Elevate your auditory experience with our acoustically tailored solutions, transforming spaces into acoustically refined environments that enhance the clarity of sound and contribute to an immersive and enjoyable atmosphere.

L I G H T I N G

Eloquent lighting masked with modernity and simplicity to illuminate your space

Sometimes it gets difficult to integrate the lighting into your ceiling structure whilst maintaining the aesthetics and design you have worked to vigorously to achieve. The Frustration that dwells on you because of it is understood here at Marconi Metal. That's why we have created Marconi Lighting solutions that bring forth a comprehensive assortment of integrated linear, downlight and cove solutions to brighten up your interior or exterior spaces with an unswerving fit and finish when using our **MATADOR®** false ceilings.

Best suited product:

All products have lighting integration capabilities

Custom/Bespoke products are available

C O R R I D O R

Infusing elegance into every overhead space, our solutions redefine pathways

As the job pertains to interior fit outs, installing false ceilings for a corridor can be quite frantic. With generally a narrow passage, design options can sometimes feel limited. Rest assured that we've got the right solution that would give you the freedom to design your ceilings the way you like without having to worry about installation and wastage incurrences. For most cases, it is best to go with full length panels that are able to support themselves to the wall at the edges; this makes it easy to install and less hectic when it's time for maintenance services.

Best suited product:

Modular & Linear Systems

Custom/Bespoke products are available

Built to endure, designed for life. Seismic solutions you can trust

In settings prone to seismic activity, where the safety and resilience of structures take precedence, addressing seismic solutions is of paramount importance. Acknowledging this critical need, our expert team introduces a holistic array of seismic solutions meticulously engineered for these environments. From seismic-resistant metal ceilings to robust wall claddings, our offerings seamlessly combine structural integrity with aesthetic appeal, ensuring buildings not only withstand seismic forces but also exhibit an enduring elegance. Trust in our seismic solutions to fortify structures and provide a secure environment, where safety meets sophistication, safeguarding lives and infrastructure alike.
